

To Whom It May Concern

The Board of the British Pump Manufacturers Association Ltd. endorses the Policy to Prevent Global Warming which was presented on behalf of the 2018 recipient of the BPMA Lifetime Achievement Award, Christopher John Rea, CBE, DL.

We endorse the principle that it would be a good thing for the Board of Directors of companies larger than 250 employees to have a policy to prevent global warming and that the policy is “Freeware”.

In particular we endorse the idea that the policy could be a business friendly policy, allowing the companies to define their own acceptable return on investment, therefore providing financial gain to the companies in question as well as having a beneficial effect on the climate.

The BPMA supports the policy as it encourages the operators and suppliers of a business to bring sustainability opportunities to the Board of Directors of larger companies.

Yours faithfully,

Steve Schofield

Director & Chief Executive
