

POLICY TO PREVENT GLOBAL WARMING

The health of the Earth is essential to not just business, but also our own survival.

The Health, Safety and Welfare of all the stakeholders in our Company is the primary concern of the Board of British Rototherm Co. Ltd.

The Company has consistently put sustainability projects first for capital investment and has now decided to debate and publish a policy to prevent global warming through technological change and investment decisions.

- Any sustainability project will be given priority over any other capital investment with a similar Return on Investment.
- Any sustainability project with a reasonable chance of getting a Return on Investment of 4 years or less, should be brought to the attention of the British Rototherm Co. Ltd.
- A written decision on any such project is mandatory within 3 months of project submission.
- All global business heads have local spending authority. Any sustainability project with a higher value should be immediately referred to the Board of British Rototherm Co. Ltd.
- As a Board we undertake to use our personal and corporate presence to influence policy makers to legislate the requirement for such a policy for all businesses with more than 250 co-workers.
- Current or potential supplier input is welcomed

The Board of British Rototherm Co. Ltd encourage employees and stakeholders to contact us on 01656 740 571 or by email at accounts@rototherm.co.uk to assist with the discreet implementation of this policy where necessary.

Oliver Conger
Managing Director
